

Paragon MLS and SentiLock

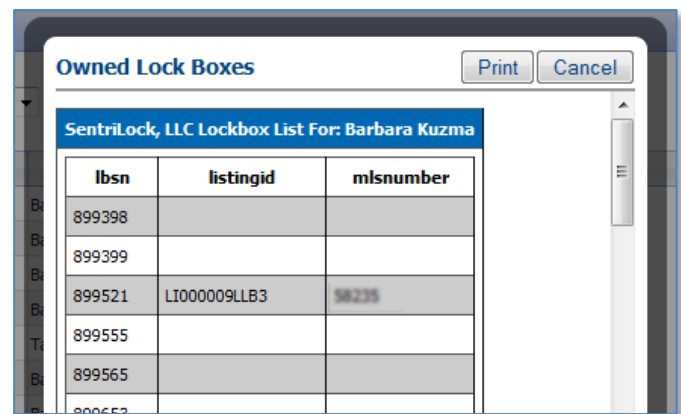

Congratulations! Your MLS has chosen SentiLock. Now, how does it work?

There are six integration points in Paragon for SentiLock. Three can be located under the LISTINGS > SENTRILOCK menu: Owned Lock Boxes, SentiCard Status and Your Showing Activity.

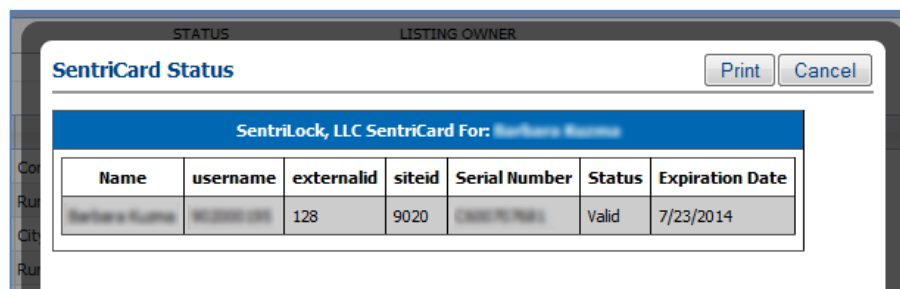

1. Owned Lock Boxes

Selecting this option will display a modal containing a list of the lock boxes that are owned by the agent, which includes the “lsbn” (lockbox #), the “listingid” (SentiLock’s ID#) and the “mlsnumber” (Paragon Listing ID) to which the box is assigned.

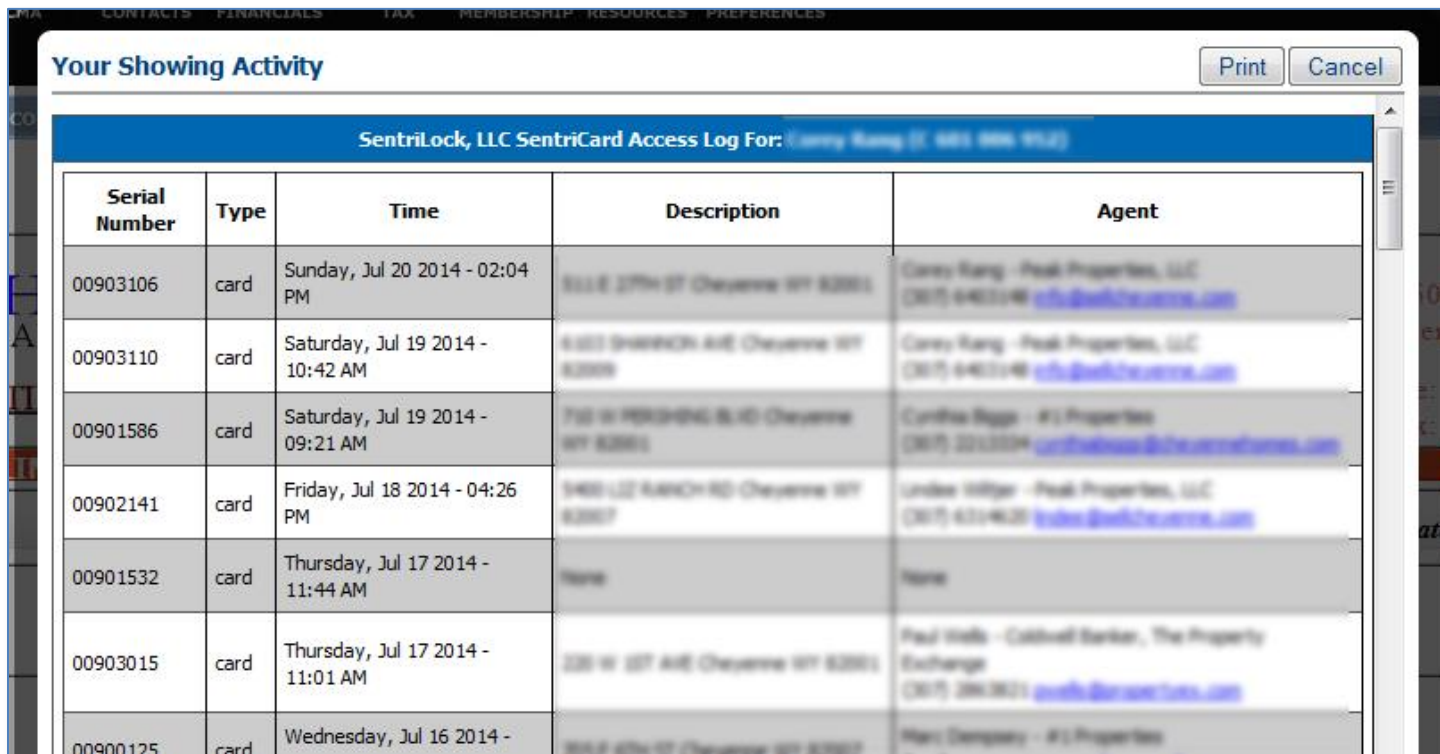

2. SentiCard Status

SentiCard Status will display the user’s current status to include the Expiration Date on the account.

3. Your Showing Activity

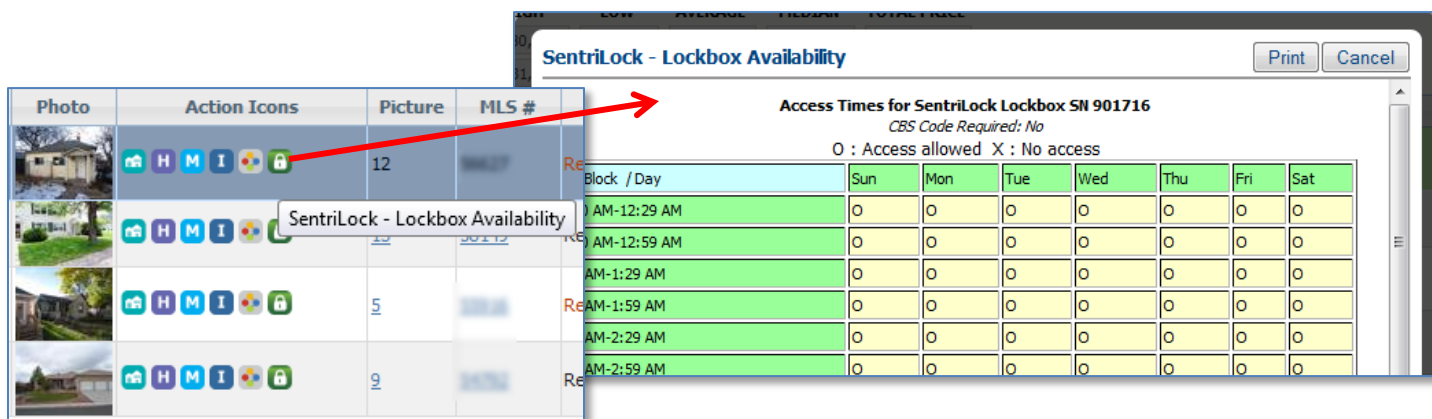

Your Showing Activity displays just that—any showings against an agent’s current properties by lockbox number.

4. Action Icon in Search Results

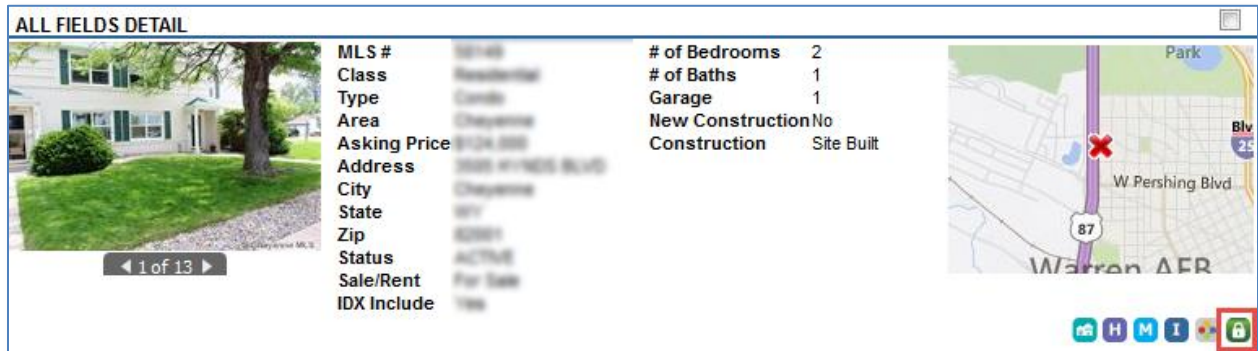

A fourth option appears as an Action Icon in search results which links to the Lockbox Availability report. This report displays when a property is available or unavailable for showings.

The screenshot shows a search results table with columns: Photo, Action Icons, Picture, and MLS #. A red arrow points from the 'Action Icons' column to a 'Sentrilock - Lockbox Availability' window. The window displays 'Access Times for Sentrilock Lockbox SN 901716' with a table of access times.

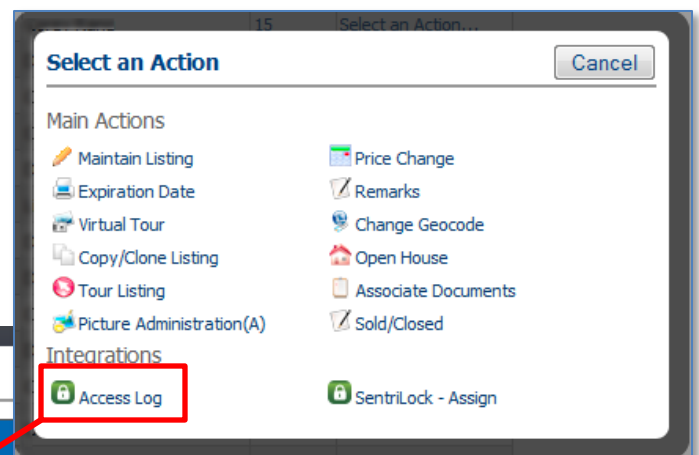

Block / Day	Sun	Mon	Tue	Wed	Thu	Fri	Sat
AM-12:29 AM	0	0	0	0	0	0	0
AM-12:59 AM	0	0	0	0	0	0	0
AM-1:29 AM	0	0	0	0	0	0	0
AM-1:59 AM	0	0	0	0	0	0	0
AM-2:29 AM	0	0	0	0	0	0	0
AM-2:59 AM	0	0	0	0	0	0	0

The Action Icon also displays by default in the All Fields Detail and can be added to other Agent-facing Reports.

5. Access Log from Select an Action in Listing Maintenance

The Access Log displays access data for specific listings with information about the agent who accessed the box and the time of the access.

6. Sentrilock – Assign from “Select an Action” in Listing Maintenance

The sixth and final integration point is the Assign Lockbox link. Clicking this option will display a list of current owned lockboxes to assign to a listing.

The screenshot shows the 'Available Lockboxes' section of the Paragon MLS interface. A dropdown menu is open, displaying a list of lockbox numbers: 899394, 901532, 901639, 901677, 901695, 901709, 901712, 901713, 901716, 901755, 901822, 901823, 901824, 901826, 901846, 901849, 901859, 901869, and 901871. The 'None Selected' option is currently selected in the dropdown.

The 'Select an Action' dialog box is overlaid on the interface. It contains a list of actions under 'Main Actions' and 'Integrations'. The 'Sentrilock - Assign' option is highlighted with a red box, and a red arrow points from this box to the 'SELECT LOCKBOX' section of the main interface.

NOTE: After a lockbox is assigned, the number will not display in this control when clicked again. If you select the Assign option again, it will display “None Selected” because the control is for assigning lockboxes. To verify the lockbox assignment, use integration point #1 above, Owned Lockboxes.
